

Please let XM radio keep providing all of their valuable services such as traffic and weather updates. I am extremely pleased with the service I get from XM and would be greatly disappointed if these services were disrupted. XM radio is a great asset and provides a great service to its customers. By enabling XM to provide these services it only helps the industry as a whole as all other formats and mediums must also offer these services for their customers to keep up. Thanks for your time

Regards,

Tim Gee
